Work Experience

TOBAM Core Investments   Oct '17 - Present
Java Developer

- Developed code for an in-house Java application used by all teams in the company. The application used a MySQL database and Hibernate ORM. GitBlit was used as a source code repository and Eclipse was the IDE of choice.

- Improved efficiency and simplified work flows by creating modules and tasks to automate business processes.

- Improved performance and user experience by editing configuration files to speed up the application and update the UI.

- Worked with session beans, JMS and WildFly.

AXA Insurance   Feb '15 - Aug '15
Actuarial and business analyst

- Enhanced data analysis for employees by developing a dashboard using Excel and VBA for updating and displaying KPIs as part of my college placement.
